

Dear ...,

My name is Abhinav Mittal and I am a second year undergraduate student pursuing Bachelor of Technology course in Computer Science and Engineering (CSE) at the Indian Institute of Technology (IIT) Guwahati, India.

I am writing to you to explore the possibility of a research opportunity under your guidance for a period of 8-12 week during the months of May 2014 through July 2014.

Owing to my high motivation to pursue a career in research, I started exploring various fields of computer science and I found.... (multiple) very interesting. My interest in Machine Learning compelled me to enroll in an online Machine Learning course on a popular website and read content available on various other websites.

Currently, I am in the fourth semester of my B. Tech. course and have a CGPA of 3.73 (out of 4). I am highly motivated to pursue a career in research. A few of my relevant courses include Data Structures, Algorithms, Linear Algebra and Differential Equations.

I am very keen to broaden my knowledge in this field and it would be great if I can get an opportunity to work under your guidance.

For my further details I am attaching my resume along with this mail for you to take a glance at it. Thank you very much for your time and consideration. I am really looking forward towards your positive reply so that I can nurture and enhance my research skills through some relevant project under your guidance.

Thanking You

Yours sincerely

Abhinav Mittal
