Introduction:

This application is made for efficient administration and management of college. It assists the authorities to manage and control various activities in college and at the same time it helps the students in efficient management of their time. It gives the faculty enough power and access to manage their courses easily so as to maximize their time for research activities without compromising on the quality of teaching. This application also enables guests to view the various programmes and facilities offered by the college.

Requirements

This application is made for windows 7. It requires .NET 4.0 framework. The behaviour of this application on previous versions of .NET framework has not been tested and hence previous versions of .NET framework are unsupported. It also requires MySQL workbench 5.6 to host database. You have given set up file, install the set up, make your MySQL password to 'root' and import the file name 'database.sql' to MySQL workbench. 'admin' is default user and its password is 'myadmin'. You can change default password using '**change password**'.

Guidelines:

➡ Noticeboard

Change password

A web form for changing a password. The form is set against a light brown wood-grain background. It contains four input fields stacked vertically, each preceded by a label in an italicized font: 'username', 'old password', 'new password', and 'confirm password'. Below these fields is a single button labeled 'change' in an italicized font. The entire form is enclosed in a window-like frame with a standard OS title bar at the top.

Write username, old password, new password and conform password and then press change

A screenshot of a web application window with a blue textured background. The window has a standard title bar with minimize, maximize, and close buttons. The interface contains three input fields arranged vertically:

- The first field is a dropdown menu with a small downward arrow on the right. Below it is the label *select course*.
- The second field is another dropdown menu, also with a small downward arrow on the right. Below it is the label *select roll number*.
- The third field is a text input box. Below it is the label *grade*.

At the bottom of the form is a button labeled *update*.

Select course that you have taken
and then select roll number give
credit and upgrade

This form has is loaded with details of student where the admin can change some details of the student.

The screenshot shows a web application window titled "admin1_noticeboard". At the top, there is a search bar with a dropdown arrow, a text input field, and a "Search" button. To the right of the search bar is an "Add Notice" button. Below these elements is a table with the following columns: "Remove", "notice_id", "heading", "text", "topic", and "timestamp". The first row of the table contains an asterisk (*) in the "Remove" column and empty cells for the other columns. A blue arrow points from the "Search" button to the text "Searches according to the heading, text or topic present in the combobox." Another blue arrow points from the "Add Notice" button to the text "Loads a form where admin can post the notices." A third blue arrow points from the "Remove" button in the first row of the table to the text "Removes the notice." The table is followed by a large grey rectangular area, likely a placeholder for a form or content, and a horizontal scrollbar at the bottom.
